MUNICIPAL REVENUE FROM FRANCHISE GASOLINE OCCUPATION SALES TAX AND BUSINESS LICENSE FEES

MUNCIPAL REPORT NUMBER 2

FOREWORD

After the close of the 1958–1959 fiscal year, questionnaires were sent to municipal officials in cities, towns and villages in New Mexico who were incorporated prior to 1959. Completed questionnaires were returned by over sixty percent of these municipalities who represent a geographical cross section of the State.

The published information is not intended to be for comparison purposes of one municipality with another but only to illustrate what each municipality is doing and the revenues it is receiving. No two municipalities are alike. Local conditions, geographical locations and the nature of services being performed by each municipality make any attempt to compare municipalities without more detailed data and knowledge of the individual communities a hazardous undertaking.

Also, not all sources of municipal revenues were examined. Only those which municipal officials had expressed interest in have been prepared for publication. The report of the City of Artesia was not included since their municipal officials were in the process of preparing a new occupation license ordinance.

We would appreciate your advising us of any errors or misrepresentation which appears in this publication. For brevity and conformity in reporting, slight changes were made in some answers reported on the questionnaires.

MUNICIPAL LEAGUE OF NEW MEXICO

RUDY RODRIGUEZ PRTG. - Santa Fe, N.M.

INTRODUCTION

The mill levy limitation which curtails municipal property tax collections to less than three mills on the assessed valuation of real and personal property has forced municipal officials to seek stable, dependable sources of revenue to meet the demands of growth and services which are being placed on their municipalities. The revenue sources reported in this publication indicate the diversity of taxes and fees needed to keep municipalities operating.

Franchise, gasoline and sales taxes are easy to administer and collect. However, considerable policing may be necessary to enforce business licensing of some itinerant businesses, and the cost of enforcing the business license ordinance may amount to more than the fees collected.

The business license fees which are printed in detail reflect the differing techniques used by local governing bodies to secure revenues and to protect the interests of the citizens of their communities. The first tabulation lists the municipalities and some sources of their revenues.

FRANCHISE FEES AND TAXES

Section 14–39–1, New Mexico Statutes Annotated 1953, authorizes the governing bodies of municipalities to grant franchises to utilities to furnish services and products to the residents of the municipality. In return for the use of the public rights-of-way by the utility, the municipality frequently requires payment of a franchise fee or tax. The fee may be a percentage of the gross receipts of the utility, a flat rate annual sum or a combination of both. In a few instances, the utility agrees to pay a fixed annual amount plus a percentage of the gross receipts if the percentage exceeds the fixed amount. With few exceptions, the utilities operating under a franchise pay two percent of their gross receipts within a municipality to the municipality as a franchise fee or tax.

The gross amount paid by a utility reflects the rates of the utility, the number of its customers, the type of utility and its geographical location. In those municipalities owning their own utility, the municipal utility often makes in-lieu-of-taxes payment to the General Fund to help support other municipal services.

In addition to the franchise receipts from the electric, gas and telephone companies, municipalities also collect franchise taxes from other types of utilities. The following tabulation indicates other utility services.

FRANCHISE FEES PAID BY BUS, TELEVISION AND WATER UTILITIES

Municipality	Nature of Franchise	Franchise Fee or Tax	1959 Receipts
Roswell	Cable TV	4%	–
Santa Fe	Bus	3%	864.32
Hobbs	Television Co.	2%	–
Clovis	Cable TV	2%	–
Lovington	–	2%	1,376.65
Gallup	Television	½%	–
Tucumcari	Television Co.	2%	923.64
Grants	Cable TV	2%	–
Silver City	Atennavision	2%	807.31
Bayard	–	2%	246.00
Central	Television	2%	118.82
Loving	Water Co.	2%	670.86

OCCUPATION TAXES AND BUSINESS LICENSE FEES

The governing bodies of a majority of the cities, towns and villages have adopted the maximum occupation tax of one dollar per annum per thousand for each one thousand dollars gross volume of business done per annum on the occupations listed in Section 14–42–7, New Mexico Statutes Annotated, 1953. However, several, whose municipalities have other adequate sources of revenue, levied only the minimum fee or charge a rate less than the maximum.

Both the levying of occupation taxes and the collecting of business license fees serve the interests of the citizens of a community. The application form filed by each business contains its address, describes the nature of its business and names its principal officer or agent.

The business license fees charged by a municipality are ordinarily on a per annum basis for those businesses not paying an occupation tax and having a permanent address within the municipality. However, for an itinerant business, a per diem, weekly or monthly fee may be assessed depending upon the length of time the business expects to operate with the municipality.

One of the most significant conclusions of this report is that the councils, commissions and board of trustees have adopted fee schedules adaptable to their own communities. Not only is there a wide variation in the fees charged each type of business but also in the fee schedules of different types of businesses within the same municipality. Also, the fee is determined in a number of different ways.

In some municipalities, hotels, motels, trailer courts and rooming houses are charged a fee based on the number of units available for rent. In a few, a scaled fee is collected on the number of units and the charge made by the operator for the units.

Amusement shows, circuses and other entertainment ventures are sometimes assessed license fees which reflect the amount of their tickets. Bowling alleys, barber shops, hairdressing establishments, vehicles used for hire and other similar businesses which contain or employ an easily counted number of units, such as number of alleys, number of chairs, number of vehicles, are frequently charged an annual fee founded upon the number of units within the business.

More complex and different methods of determining fees for different types of businesses are reported in Appendix A. Because of space limitation some businesses licensed by the various municipalities were not reported.

GASOLINE TAX

Pursuant to the authority granted under Section 14–43–1, New Mexico Statutes Annotated 1953, a number of cities, towns and villages have imposed a one cent per gallon tax on gasoline and motor fuels sold within the municipality. The receipts from this tax may be used for general or special municipal purposes.

SALES TAX

In their search for a stable, dependable source of revenue, a number of municipalities have resorted to a one percent sales tax for a number of reasons. The sales tax reflects the economy of the times and has a broad base. Those persons, such as transients, tourists and others, who use a community's services help support these services through payment of the sales tax. Also, the tax is easy to administer.

The variations in per capita payment of the municipal sales tax is due to a number of factors. The geographical location of the community, the number of tourists it attracts, the trade area it serves and the economy of the region result in municipalities of similar size receiving differing amounts from sales tax revenues.

The retailer or merchant collects the municipal sales tax from the customer and then remits this tax along with the State sales tax to the State Bureau of Revenue. A collection charge amounting to three percent of the municipal sales tax is retained by the Bureau for administrative costs and the balance is returned to the municipality.

MUNICIPAL SALES TAX RECEIPTS AND 1959–1960 EXPECTED REVENUE

ORDINANCE NO. 77

AN AMENDMENT OF SECTION 3 OF ORDINANCE NO. 77

LEVYING AN EXCISE TAX UPON THE
SALE OF GASOLINE AND MOTOR FUEL
IN THE TOWN OF BELEN, NEW MEXICO

Section 3. The Clerk of the Town of Belen may designate a city employee who shall at all reasonable times read the gasoline pump meters within the town limits of the Town of Belen. The Town Clerk shall designate a certain day of each month when said meters shall be read by said employee and he shall notify firms that may have gasoline pumps with regards to same.

Any gasoline used from tanks which is not dispensed through a meter shall be computed from invoices of any person or firm owning or using same.

Meters used on gasoline pumps shall be kept in readable condition.

The Town Clerk shall bill wholesalers of gasoline monthly for the tax as set out in this ordinance.

This ordinance is hereby declared to be an emergency measure on the grounds of urgent public need and, therefore, shall be in full force and effect in five (5) days after the final passage and publication of same.

This ordinance shall be recorded and authenticated by the Mayor and Clerk of the Town of Belen as required by law.

Adopted, passed, filed and approved, this 23rd day of May, 1960.

Clerk

Published in News-Bulletin
May 25, 1960

CITY MOVES TO RAISE RECEIPTS FROM GAS TAX

Declaring that the town of Belen was not getting its full share of receipts from one-cent per gallon tax on the sale of gasoline in the city, the council unanimously approved an amendment to Section 3, Ordinance 77, pertaining to the collection of the tax.

The amendment rescinds a provision of the ordinance which provides that distributors or retail dealers of gasoline submit a statement to the town clerk by the 15th of the month of all gasoline or motor fuel sold during the previous month.

It provides, instead, that the town clerk appoint an employee to read gasoline pump meters at a specified day each month, after which the wholesalers shall be billed for the amount of the tax due.

Mayor Hollis Wilson, and Clerk Francis L. Castillo both favored the amendment, claiming that the city was losing much revenue because payment of the tax to the city was being either "bypassed," or some dealers or distributors were not computing it accurately. They cited gasoline tax revenue figures of $30,000 for Socorro in 1959 compared to only $10,000 for Belen in the same year.

Trustees Agapito Garcia and Earl McManis and Mayor Wilson then approved the measure.

Passed as an emergency measure, it will take effect five days after publication.

Dear Hollis:

I had the News Bulletin of Belen, New Mexico, forwarded to me several days ago, but I have been out of town in the meantime. I wanted to drop you a note to congratulate you on your successful campaign for Mayor of the City of Belen.

I think this is a fine gesture on your part and speaks well for our industry. Sure hope you will not get so far in politics that you will forget us old poor boys.

Yours very truly,

Herb Reynolds

Dear Mr. Wilson:

The copies of the contract with the Bureau of Educational Services and Research, University of New Mexico, have been executed by that Bureau, this Department, and the Attorney General. One completely executed copy is returned for your files.

The copies of the other contract have not yet been received from the firm of Flatow, Moore, Bryan, and Fairburn, but will be processed immediately upon receipt.

Best wishes for a Happy New Year.

Very truly yours,

SEWAGE TREATMENT PLANT IMPROVEMENTS

PRELIMINARY REPORT

SEPTEMBER 1960

D.F. MOLZEN AND ASSOCIATES

CONSULTING ENGINEERS

ALBUQUERQUE, NEW MEXICO

To the Mayor and Trustees
Town of Belen
Belen, New Mexico

Gentlemen:

In accordance with your authorization, we have prepared and are presenting herewith a one-volume report covering the future need and recomended improvements for the sewage treatment facilities to serve the Town of Belen.

Also included in this report is an engineers estimate of cost. The costs are preliminary though determined as accurately as the scope of the studies would permit short of developing construction plans and specifications. The estimate reflects current construction costs and if there is any undue lapse of time before construction is initiated on this project, such lapse of time will tend to decrease the accuracy of this estimate.

We have attempted to outline for you the most economical and workable sewage treatment plant possible, and in keeping with sound engineering principles. We hope this report will meet with your approval.

Very truly yours,

D.F. Molzen and Associates

PRELIMINARY REPORT

BELEN SEWAGE TREATMENT FACILITIES

PART I

G E N E R A L

A. AUTHORIZATION

This Engineering Report was authorized by the Governing Body of the Town of Belen, New Mexico, at a special council meeting of September 9, 1960.

B. PURPOSE OF REPORT

The purpose of this Engineering Report is to study the existing sewage treatment facilities of the Town of Belen, New Mexico, and determine its deficiencies, and establish the criteria of design and a preliminary estimate of cost to provide adequate capacity in accordance with present day requirements. This report will provide the necessary information to complete the "Department of Health, Education, and Welfare" application forms for a Federal Grant under Public Law 660, for sewage treatment plant improvements.

PART II

D E S I G N R E Q U I R E M E N T S

A. DESIGN PERIOD

In planning new sewage treatment plants, remodeling, or expanding existing plants, the project should be planned for some time in the future. This future design period should be at least as long as time required to pay for the facilities and possible as long as the useful life of the equipment and structures used in the construction.

B. POPULATION

The contributing population for the design period must be estimated in order to check the adequacy of existing facilities and to give a basis for designing new facilities.

The 1960 Federal Census showed a population of 4,950 within the Town of Belen. Town records indicate 1,256 connections to the municipal sewage system. There are approximately 300 more connections to the water system than to the sewer system. It is, therefore recommended that the improvements proposed for the treatment facility be designed for a population of 8,000 persons.

It should be pointed out that this population is 1.6 times the present population, and it is entirely possible that the Town may, under the right set of circumstances, will attain this growth well before the estimated 20 years of treatment facility life. However, it is believed that planning for a growth greater than that estimated would be uneconomical. It is far better for the present population to pay for their own needs with a reasonable allowance for future expansion. When growth surpasses the design population, additional tax payers will be available to shoulder some of the expenses of additional facilities.

C. SEWAGE FLOWS AND PLANT DESIGN

It is common engineering practice to base designs of sewage treatment plants on a flow of 100 gallons per capita per day. Therefore, the proposed plant improvements will be based on an average flow of 800,000 gallons per day. For design purposes, the short peak flow will be assumed as twice the average flow.

Existing and proposed treatment facilities will be examined or designed in accordance with established engineering criteria and in accordance with policies and design criteria established by the New Mexico Water and Sewage

PART III

E X I S T I N G S E W A G E T R E A T M E N T P L A N T

A. GENERAL

The existing treatment units are examined in respect to current established design criteria.

B. STUDY OF EXISTING PLANT

1. Plant Units. The following tabulation shows the status of various controlling design elements of the existing units in relation to those required by the design criteria for present population

Unit	Existing	Required	Adequate	Inadequate
Pumping Station:	Two 375 gpm pumps	Adequate for present pop. Allows for a little more growth.	X	
Primary Clarifier: Surface Area Min. Detention Time Max. Surface Loading Weir Length	 1256 Sq. Ft. 2 Hr. 15 Min. 500 Gal. per sq. ft. per day 125.6 feet	 1000 Sq. Ft. 2 Hr. 1000 Gal. per sq. ft. per day. 50 feet	 X X X X	
Trickling Filter: *Volume (min) Surface Area *Based on recirculation	 218 cu. yd. 1964 Sq. Ft.	 340 cu. yd.		 X X
Recirculation pumps	Inoperative	Two at 375 GPM	X (if repaired)	
Secondary Clarifier	None	1-40 Ft. Diam.		X
Sludge Digester:	12,000 cu.ft.	17,000 cu.ft.		X
Sludge Beds	4200 Sq. Ft.	5,000 Sq. Ft.		X
Gas Burner	1	1	X (if repaired)	

As may be seen, only a small portion of the existing plant can be considered adequate for the present population with that portion now adequate leaving little or no room for additional growth.

2. Additional Considerations.

a. All steel yard piping has deteriorated to a point that it must be replaced, including steel force main from pumping station.

b. Sludge drying beds are in very poor condition and must be rebuilt.

c. Plant does not have flow measuring device to determine actual flows.

d. Recirculation pumps inoperative

e. Waste gas burner inoperative.

f. No method of sludge circulation is provided in the digester to give proper digestion during long periods of holding.

g. Pump house windows need replacing and proper ventilation provided.

h. No chlorination equipment for use when plant is bypassed to drain, as required by State Health Department.

PART IV

P L A N T I M P R O V E M E N T S

A. GENERAL

It has been determined by this study, in addition to those made by the State Health Department, that the Belen Municipal Sewage Treatment Plant is in need of major repair, renovation, and expansion in order to provide the degree of treatment necessary to safeguard the health of the

community and preventing the facilities from becoming a public nuisance.

B. RECOMMENDATIONS

All the repairs noted in the preceeding section should be acomplished. Since this alone will not bring the treatment facilities up to present day standards, the plant should be expanded to provide this required degree of treatment and to allow for future expansion of the community. Expansion would be handled as follows:

1. Remodel or replace pumps in pumping station to handle increased flows.
2. Raise walls of existing trickling filter to provide greater capacity and provide additional filter to operate in parallel with existing filter.
3. Provide secondary clarifier.
4. Rebuild the present recirculation pumps or install new pumps to give proper recirculation rates.
5. Provide a positive method of control of recirculation rate through plant by float controlled butterfly valve in wet well on recirculation line.
6. Provide a new digester to give volume required, with pump house to house sludge circulation pump and sludge transfer pump.
7. Provide new sludge drying beds of required capacity.
8. Construct new outfall line to river or provide chlorine contact chamber, to be used when raw sewage is bypassed to drain.

C. CONCLUSION.

It is recommended that the Town of Belen proceed with the application for Federal Grant Funds and when the amount available is known, proceed

with the necessary arrangements for the remaining financing. When the financing is completed, the Town should authorize the Engineers to prepare final construction plans and specifications and arrange for construction of the improvements.

PART V

P R E L I M I N A R Y P L A N T D E S I G N

1. Population:

Present	4,950
Design Population	8,000
Sewage Flows	100 gallons per 24 hrs.
Plant Design Flow	800,000 gal per day = 555 gpm
Probable max. Flow	1110 gpm
Probable min. Flow	250 gpm
Assumed BOD	= .17 lb per capita = 1360 lb per day
Future Industrial Wastes	100 lb per day
Garbage Grinders (5% population)	68 lb per day
Total	1528 lb per day
33 1/3 % removed in primary	519 lb per day
Remaining in Settled Sewage for Trickling Filter	1009 lb per day

2. Pumping Station:

Convert existing pumps to 550 gpm or install new 550 gpm pumps.

3. Primary Clarifier:

Existing	40 ft. Diam - 8 ft. SWD
Volume	75,159 gallons
Surface Area	1,256 sq. ft.
Surface Loading	640 gal per sq. ft. per day.
Weir Length	125.6 ft.
Weir Loading	6,380 gal per linear ft per day
Detention Time	2 hrs. 15 min.

4. Trickling Filter:

Existing	50 ft. Diam - 3 ft. deep
Area	1964 sq. ft.
Volume	218 cu. yds.

Volume required for 1.75 lb BOD per cu. yd. = 577 cu. yds.

Raise walls of existing filter 1 ft. to give 4' depth.

Provide one new filter- 50 ft. diam - 4 ft. deep

Volume 2 Filters	=	583 cu. yds.
	=	.360 acre ft.
BOD Application	=	1.75 lb per cu. yd.
Sewage Application	=	2.20 MGAD

Effluent will be split and part returned to wet well for recirculation through trickling filter at 1:1 ratio. Flow controlled by float operated butterfly valve in wet well

Efficiency (Using NRC Formuli)

Recirculation Factor, $F = \frac{1+R}{(1+0.1R)^2}$

$$F = \frac{1+1}{(1+.01x1)^2} = 1.65$$

Organic Loading $L = \frac{BOD}{VxF}$

$$L = \frac{1009}{.360 \times 1.65} = 1700 \text{ lb per acre ft. per day}$$

$$E = \frac{100}{1 + .0085\sqrt{L}} \qquad \frac{100}{1 + .0085\sqrt{1700}}$$

$$= 74\%$$

BOD Removed in Filters	=	748 lbs per day
BOD Remaining in Plant eff	=	261 lbs per day

$$\text{Plant eff.} = \frac{1528-261}{1528} = 83\%$$

5. Secondary Clarifier

40 ft. diam, 8 ft. S.W.D.

Sludge removal automatically pumped to Primary Clarifier.

Volume	75,159 gallons
Surface Area	1,256 sq. ft.
Surface Loading	640 gal per sq. ft. per day
Weir Length	125.6 ft.
Weir Loading	6,380 gal per linear ft. per day
Detention Time	2 hrs. 15 min.

6. Digesters:

3.5 cu. ft. per capita

Volume of Existing Digester	12,000 cu. ft.
Volume Required	28,000 cu. ft.

Provide New Digester 35 ft diam, by 17 ft. deep

Provide new sludge pump house for sludge circulation pump and sludge transfer pump

7. Sludge Drying Beds:

Required		1 sq. ft. per capita
Use 8 beds 30 ft x 35 ft	=	8,400 sq. ft.

8. Clorine Contact Chamber

Min Detention Time, 15 min at ave flow = 8,250 gal.

Contact Chamber 6'deep x 10' wide x 18' long
